### Fun Bible Facts

#### Noah's Ark

The ark was approximately 450 feet long, 75 feet wide and 45 feet high.

Its length to width ratio of six to one provided excellent stability on the high seas. In fact, modern shipbuilders say it would have been almost impossible to turn over.

The total available floor space on the ark would have been over 100,000 square feet, which would be more floor space than in 20 standard-sized basketball courts.

Noah's Ark would have had a cubic volume equal to 569 modern railroad stock cars.
